PROFESSIONAL SUMMARY

Material Controller at dnata Catering UK, handling stock control, local purchasing and SAP reporting for an airline catering unit. My day starts with the stock-on-hand report that goes to around 20 people across operations and account teams, and much of the rest is making sure what's on the shelf matches what's in the system, bonded alcohol included. Before this I worked in aviation security compliance at dnata. In my own time I've built SQL, Python and Power BI projects and completed CompTIA Data+ and the Google Data Analytics Certificate. Now looking to move into a Supply Chain, Inventory or Data Analyst role.

WORK EXPERIENCE

Material Controller

dnata Catering UK Limited – London, United Kingdom
Aug 2026 – Present

- Send the daily stock-on-hand report from SAP to around 20 stakeholders across operations and account teams.
- Reconcile physical counts against SAP, ClarityQB, WMS and Cbase, including bonded alcohol stock kept under customs rules.
- Run local purchasing with 8 suppliers: around 10 purchase orders (POs) a week, up to £15,000 each, checked against deliveries when they arrive.
- Chase short deliveries, and work with procurement to source alternatives when a supplier discontinues a product.
- Check each day's flight requirements against what we hold and escalate anything urgent.
- Stock rotation (FIFO/FEFO), expiry checks and internal transfer orders in SAP.
- First contact for local purchasing; second contact for the Singapore Airlines account.

General Assistant – Aviation Security & Compliance

dnata Catering UK Limited – London, United Kingdom
Sept 2025 – Aug 2026

- Completed Flight Final Certificates (Schedule 8.1) and Truck Security Certificates (8.2) under DfT rules for daily flight dispatches.
- Carried out "inside-out" physical inspections of carts and vehicles before sealing.
- Reconciled physical inventory against flight lists, logging seal numbers, canister counts, driver details and manifests.
- Supervised loading so the paperwork matched what actually went on the truck.

Business Analyst Intern

Zither IT Consulting – Sydney, Australia
Dec 2023 – Apr 2024

- Tested a CRM system, logging defects and tracking each one to resolution in Asana.
- Gathered and validated requirements with business stakeholders.
- Cut issue turnaround time by about 20% by tightening defect tracking and documentation.

Hospital Assistant

Sydney Local Health District – Sydney, Australia
Nov 2022 – Jan 2025

- Restocked medical supplies and consumables on the ward and flagged low stock to nursing staff before it ran out.
- Supported nurses and clinical staff with daily ward tasks so the unit kept running smoothly.
- Transported patients, equipment and linen between wards and departments.

- Kept rooms and equipment clean and ready to infection-control standards.

SKILLS

- **Supply chain & inventory:** inventory control, stock reconciliation, purchase orders, procurement, supplier management, stock rotation (FIFO/FEFO), expiry management, bonded warehouse (customs), internal transfer orders
- **Systems:** SAP, WMS, ClarityQB, Cbase, Microsoft Excel (Power Query, PivotTables, VLOOKUP)
- **Data & analytics:** SQL (joins, CTEs, window functions), Google BigQuery, Python (Pandas, NumPy, Matplotlib, Statsmodels), Power BI, data cleaning, KPI reporting, A/B testing, customer segmentation
- **Other:** Git/GitHub, Jupyter Notebook, VS Code, Asana, requirements gathering, system testing

PROJECTS

Sales & Profitability Analysis | Python (Pandas, Matplotlib)

- Analysed $1.71M of retail sales and found a negative correlation (-0.51) between discount level and profit; recommended a 20% discount cap to protect margin.

Sales & Customer Segmentation Dashboard | SQL, Power BI

- Segmented customers in SQL and found the demographic groups driving 75% of revenue; built a Power BI dashboard showing revenue drivers, high-margin products (84.44%) and return patterns.

RFM Customer Segmentation | Google BigQuery, Power BI

- Scored 287 customers across 994 orders on recency, frequency and monetary value, and grouped them into segments in Power BI.

Marketing A/B Test Analysis | Python (Statsmodels)

- Ran significance testing on 588,000 records to compare conversion between test and control groups.
